LACTOSE AND MILK PROTEIN FREE

**TOTALLY  
DAIRY FREE**

The major concern in the dairy world are both **lactose intolerance** and **allergy to milk proteins**.

If for adults the problem does not exist particularly since there are several products on the market, **for children it is a more difficult reality to face**. The lack of products designed specifically for them does not help them overcome the discomfort caused by this situation.

We had to do intense literature review and also conduct a survey to better understand the problem.

Based on the feedback we received, we decided to develop a **healthy, nutritionally complete snack designed specifically for children** who are lactose intollerant and have milk protein allergy
