

SAFETONIGHT is a personal safety device for whoever wants to feel safer while they are out and about.

Press the button for a few seconds and the app will automatically execute the pre-set functions on the mobile phone.

The features are as follows:

1. Send a message or a pre-recorded call containing a request for help and geolocation to the chosen contacts and / or the police.
2. The mobile phone starts recording (audio or video)
3. [Additional feature] The app notifies other SAFETONIGHT users nearby with a request for help and location on the map.
