Perugini

OUR IDEA:

Our project is an app with the goal of helping students of every kind of school, including university, getting better results. Downloading this app allows you to get in touch with students from all over Italy, in order to create study groups. The app gives you the opportunity to join public forums for every subject and to do up to ten private calls a day, each with no time limits. With a premium account you also get access to a great variety of didactic material uploaded by other students and we offer you the possibility to attend private lesson from verified tutors.
