

SIGN GAME

Discovering Sign Language while having fun

We are Elisabetta Mercuri, Rebecca Squadroni, Giorgia Turchi, Gesjana Reka, Elisa Milanese and Alessia Morelli. Six students attending the first year of the same degree course: Western and Eastern foreign languages and cultures, since we wanted to explore the world and the various traditions each population has. We share the desire to reduce the existing gap between the child with sensory hearing disability and the context, where it is the latter who, necessarily, must shorten distances. One word contains many: Inclusion.

For this reason we have thought of a card game, the SIGN GAME, which allows people to explore many aspects of the child's development: thinking, language, emotions and relationships. The ultimate goal is to increase the knowledge of Sign Language through simple and enjoyable fun for everyone.
