

Travel biscuit

Our project:

Our project was born from the need to provide a natural, healthy and tasty product against the effects of travel sickness. Thus, was born the idea of travel biscuit, an anti-nausea snack composed of two layers of wholemeal shortcrust pastry which contains a fresh ginger-lemon gelée. Thanks to the presence of different natural bioactive components, our product represents a valid alternative to anti-emetic medicines. With «travel biscuit» we are trying to make travels an enjoyable experience for everyone!

Who we are:

Safe travel team
