OTHER INFORMATION

The headquarters of PCQ Srl is in Ancona, but the network of collaborators present throughout the national territory remains dense, collaborating with the company as external inspectors and certified auditors.

VISION

We want to be a strong point of reference for companies and their business. A company attentive to the needs of different sectors and their customers, recognized throughout the territory for its professionalism and authenticity in doing things well.

OUR VALUES

The openness to market opportunities and flexibility in dealing with constant changes is the result of a corporate culture that for years has seen the support of experienced and professional staff, with young people full of enthusiasm and proactiveness. We believe that this stimulates teamwork, involvement and the creation of positive relationships which are then reflected in a job done well.

We believe in the continuous comparison between different offices, to allow everyone to be involved in what the company does, stimulate participation and never feel like you have reached the point of improvement.

MARKET OPPORTUNITIES

Our solution consists in providing high value services for companies, design studios and public administrations. In a constantly evolving and increasingly complex regulatory context, the support of an Accredited Body becomes fundamental for the pursuit of the objectives in pre-established times and with the reduction of critical issues in favor of a qualitative improvement..

THE COMPETITIVE ADVANTAGE

As an Inspection and Certification Body, we differentiate ourselves from our competitors for the authentic approach to our customers and for the high degree of internal specialization of the Inspectors.

In fact, the internal organizational structure of PCQ allows not only to favor a direct approach between the Inspector and the customer, guaranteeing the latter to always interact with a single interface, but also to create a sharing and exchange of skills between the internal teams of the different sectors.

BUSINESS MODEL

The company is organized according to certified quality procedures, which allow the identification of potential critical issues and the continuous improvement of each phase of the service delivery process. The key element, at the basis of the corporate value, is the third party guaranteed by Accredia with periodic checks to verify the methods and quality of the operating procedures. Furthermore, it is also the constant training of the staff to keep up to date on the regulatory changes in the sector.

VERIFICATION OF THE PROJECT FOR VALIDATION PURPOSES

VERIFICATION OF THE PROJECT FOR VALIDATION PURPOSES

The design verification activity carried out by PCQ, PROVIDED FOR BY ART. 26 OF THE PROCUREMENT CODE, is characterized by the specific approach aimed at entering into the merits of the critical issues of the project, obviously respecting the autonomy of the designer and the choices of the RUP, always placing itself in a constructive manner and never hindering the construction process. The working method adopted is able to provide an important added value to the project making it robust at a contractual level, so as to guarantee the contracting authority as much as possible from the possibility of reserves in the procurement phase.

SUPPORT TO THE PROCEDURE MANAGER

SUPPORT TO THE RUP - SOLE RESPONSIBLE FOR THE PROCEDURE

The support to the RUP is aimed at making a third-party contribution for complex procurement procedures in the field of Civil-Construction-Environmental Engineering and Industrial Plant Engineering works. The support is at 360 ° depending on the needs that may involve: the entire process of a public contract FROM THE DESIGN TO THE IMPLEMENTATION OF THE WORK, the SPECIFIC management of the contract with BIM technologies, the investigation and structural diagnostics.

TECHNICAL CONTROL ON SITE

TECHNICAL CONTROL ON SITE

Technical control on site for insurance purposes, to identify or avoid non-conformities and defects in the work, thus facilitating obtaining the ten-year posthumous policy.

OTHER SERVICES

OTHER SUPPORT SERVICES TO CONSTRUCTION COMPANIES

Feasibility assessment, design verification and supervision in order to avoid disputes and delivery delays through effective cost forecasting, supervision and design verification. PCQ provides its experience in Project Management and Project Financing, guaranteeing a highly qualified support and supervision service.

Other construction support services are: energy certifications and diagnoses, verification of acoustic requirements on site and acoustic testing, preparation of the work file, additional site checks and structural diagnostics.

SYSTEM CERTIFICATIONS

SYSTEM CERTIFICATIONS

As an Accredited Certification Body it issues ISO 9001, ISO 14001 and ISO 45001 certificates valid internationally. The certifications cover different sectors: CONSTRUCTION, DESIGN SERVICES, GENERAL services, training and much more.

STRUCTURAL DIANOSTICS

STRUCTURAL DIANOSTICS

It is an internal PCQ department, equipped with a laboratory specializing in ON-SITE testing and monitoring of existing structures.
